As previously reported, during September CPS closed its third term securitization transaction of 2015 and the 18th transaction since April 2011. This is the Company's first transaction to earn a triple "A" rating from both DBRS and Standard & Poor's on the senior class of notes. In the senior subordinate structure, a special purpose subsidiary sold six tranches of asset-backed notes totaling \$300.0 million. The notes are secured by automobile receivables purchased by CPS and have a weighted average effective coupon of approximately 3.78%. The transaction has initial credit enhancement consisting of a cash deposit equal to 1.00% of the original receivable pool balance. The final enhancement level requires accelerated payment of principal on the notes to reach overcollateralization of 4.00% of the then-outstanding receivable pool balance.

"We are pleased with our operating results for the third quarter of 2015," said Charles E. Bradley, Jr., Chairman and Chief Executive Officer. "Our managed portfolio is now in excess of \$1.9 billion and we achieved our 16th consecutive quarter of increasing quarterly earnings. Also, with our 2015-C securitization, we reached a significant milestone by earning two triple "A" ratings on the senior class of notes."

Forward-looking statements in this news release include the Company's recorded revenue, expense and provision for credit losses, because these items are dependent on the Company's estimates of incurred losses. The accuracy of such estimates may be adversely affected by various factors, which include (in addition to risks relating to the economy generally) the following: possible increased delinquencies; repossessions and losses on retail installment contracts; incorrect prepayment speed and/or discount rate assumptions; possible unavailability of qualified personnel, which could adversely affect the Company's ability to service its portfolio; possible increases in the rate of consumer bankruptcy filings, which could adversely affect the Company's rights to collect payments from its portfolio; other changes in government regulations affecting consumer credit; possible declines in the market price for used vehicles, which could adversely affect the Company's realization upon repossessed vehicles; and economic conditions in geographic areas in which the Company's business is concentrated. All of such factors also may affect the Company's future financial results, as to which there can be no assurance. Any implication that the results of the most recently completed quarter are indicative of future results is disclaimed, and the reader should draw no such inference. Factors such as those identified above in relation to the provision for credit losses may affect future performance.
