Investment Considerations

- CPS has weathered multiple industry cycles to remain one of the few independent public auto finance companies
- Forty-seven consecutive quarters of pre-tax profits
- Attractive industry fundamentals with fewer large competitors than last cycle
- Consistent credit performance
- Opportunistic, successful acquisitions
- Stable senior management team averaging 20 years of experience owns significant equity

Reference to Public Reports

- ▶ Any person considering an investment in securities issued by CPS is urged to review the materials filed by CPS with the U.S. Securities and Exchange Commission ("Commission"). Such materials may be found by inquiring of the Commission's EDGAR search page www.sec.gov/edgar/searchedgar/companysearch.html using CPS's ticker symbol, which is "CPSS." Risk factors that should be considered are described in Item 1A, "Risk Factors," of CPS's most recent annual report on Form 10-K and subsequent reports on Form 10-Q, which reports are on file with the Commission and available for review at the Commission's website. Such description of risk factors is incorporated herein by reference.

Safe Harbor Statement

- Forward-looking statements in this presentation include the Company's recorded figures representing allowances for remaining expected lifetime credit losses, its markdown of carrying value for the portion of its portfolio accounted for at fair value, its charge to the provision for credit losses for its legacy portfolio, its estimates of fair value (most significantly for its receivables accounted for at fair value), its entries offsetting the preceding, its anticipated credit facility capacity, and figures derived from any of the preceding. In each case, such figures are forward-looking statements because they are dependent on the Company's estimates of cash to be received and losses to be incurred in the future. The accuracy of such statements may be adversely affected by various factors, which include (in addition to risks relating to the economy generally) the following: possible increased delinquencies; repossessions and losses on retail installment contracts; incorrect prepayment speed and/or discount rate assumptions; possible unavailability of qualified personnel, which could adversely affect the Company's ability to service its portfolio; possible increases in the rate of consumer bankruptcy filings, which could adversely affect the Company's rights to collect payments from its portfolio; other changes in government regulations affecting consumer credit; possible declines in the market price for used vehicles, which could adversely affect the Company's realization upon repossessed vehicles; economic conditions in geographic areas in which the Company's business is concentrated; and a default under any credit facility debt agreement which, if not waived could result in acceleration of the related indebtedness and impair the Company's ability to secure additional financing. Any or all of such factors also may affect the Company's future financial results, as to which there can be no assurance. Any implication that past results or past consecutive earnings are indicative of future results or future earnings is disclaimed, and the reader should draw no such inference. Factors such as those identified above in relation to losses to be incurred in the future may affect future performance.
